

Priority Restoration Application

In the event of a hurricane or major storm, LUS has established two parallel priority electric utility service-restoration approaches:

- Restoration to as many customers as fast as possible
- Restoration to qualified Public Safety, Media and Medical Facilities

If you are a medical facility and would like to be considered by LUS for priority restoration of electric utility service following a major storm, please complete this application and return to the address listed below.

Medical Facility

Name: _____
Medical Facility

Address: _____
Street Address *Suite #*

_____ *State* *ZIP Code*

Priority Restoration Application

- ▶ Please attach a detailed electric-service interruption plan for the medical facility, including specifics of what the facility will do if electric utility service is interrupted for **at least 48 hours** and specific backup-electric generation arrangements. Please also include the amount of time your facility can function without electric utility service (i.e. using generators and/or other emergency methods for light).
- ▶ Please sign below stating that your facility complies with the **48-hour sustainability agreement**.

I hereby affirm that this facility is in a position to withstand at least a 48-hour interruption in LUS electric utility service, either by provision of our own electric generation source or by some other means, or to have our patient and/or business needs served elsewhere. I also understand that LUS cannot guarantee the restoration of electric utility service even after 48 hours of interruption has elapsed.
